Building Advanced Solutions for Sustained Success

We are driven to provide advanced solutions to our customers, from individual components, i.e. screws, packers, barrels, liners, etc., to complete production lines. As a diversified provider of extrusion technologies and components for catalyst, carbon filtration, ceramics, mastics, food and plastics industries, our product offerings are extensive.

CF Extrusion Technologies offers highly specialized tabletop, twin feed, batch load, and custom designed extruders, as well as extrusion dies, feeders, mixers, cutters and controls. Our extensive engineering experience allows us to also provide replacement parts for virtually any brand of extrusion component.

- **Innovative design**
- **Customized engineering**
- **Quality manufacturing**
- **Technical support**
